## HOW THE ECOGLO SYSTEM WORKS

Ecoglo uses a patented process to produce a range of products that provide a four pronged solution to pathfinding needs:

- step edge contrast
- slip-resistance
- visibility in all light conditions
- resistance to wear

## ROUGH

The hard-wearing silicon carbide non-slip material is just what you need to reduce slips and falls in all weather conditions. Your patrons will commend you, not complain to you. With their UV resistance and good looks, you can confidently install Ecoglo products inside and out.

## TOUGH

Our patented process bakes in the photoluminescent powder and non-slip material and you get to savor the results. Thousands of people can walk on these products thousands of times with no wear and tear. And just to make sure, we've put them through extensive testing at internationally accredited laboratories relating to durability, weather resistance, UV resistance, stain resistance, abrasion and cleaning. And they passed with flying colors.

## SEEN

Unlike electrical or battery lighting, Ecoglo products will never let you down. They will glow brightly in the dark for many hours giving your patrons confidence in exiting, even in an emergency. Some steps are just too hard to see, whether it be day or night. With Ecoglo, you can be sure your patrons will see the steps, not fall down them, whatever the light conditions. It's the combi-

nation of the photoluminescent strip and the non-slip material that creates such great step edge definition.

## GREEN

Every small step you take to reduce electricity usage helps save our environment. Ecoglo products let you recycle natural sunlight or artificial light. No electricity is required. Ecoglo also goes green by using recycled aluminum. All products are non-toxic and non-radioactive. Designed to last the life of your facility, Ecoglo avoids maintenance costs. Ultimately, Ecoglo is recyclable which avoids the cost of landfill dumping.

ECOGLO STRENGTHS	DELIVER REAL BENEFITS
High quality anti-slip material	Reduces slips and falls
High quality photoluminescence	Visible for hours in dark conditions
Baked in process	Hardwearing, no repainting
Step edge contrast	Reduces falls in light or dark conditions
Recycles natural or artificial light	Decrease electricity usage, increased sustainability
UV resistance	Can be installed inside or out
Internationally accredited testing	Specify with confidence
